Ochi

- Description: Developed a dynamic and interactive website named "Oshi" utilizing modern web development technologies and tools to create an engaging user experience.
- Technologies Used:
- Frontend: React, HTML, CSS, JavaScript
- Animations & Scroll Effects: GSAP (GreenSock Animation Platform), ScrollTrigger, LocomotiveScroll
- Key Features:
- Smooth Scrolling & Animations: Implemented smooth scrolling and advanced animations using GSAP and LocomotiveScroll to enhance user engagement.
- Component-Based Architecture: Built reusable and maintainable components with React for efficient development and easy updates.
- Custom Animations: Utilized GSAP and ScrollTrigger for creating interactive and visually appealing animations tied to the user's scroll actions.
